• 68% of respondents support the inclusion of financial literacy education in colleges, highlighting awareness of its importance.

10. Budget Discipline is Inconsistent

• Most students maintain budgets only occasionally rather than consistently,

Executive Summary & Recommendations

Major Findings

1. Savings–Budgeting Gap

- **62%** of students save money, but only **26%** actively follow a monthly budget.

2. Moderate Financial Literacy

- The average financial skill rating is **2.92/5**, indicating scope for improvement.

3. Dependence on Family Income

- Parents and family are the primary source of income.

4. Low Expense Tracking Adoption

- A significant number of students do not regularly track their expenses.

5. High Accommodation Spending

- Accommodation represents the highest spending category among respondents.

6. Strong Support for Financial Education

- Most students support introducing financial literacy programs in colleges.

Strategic Recommendations

- Encourage monthly budget planning.
- Promote regular expense tracking using digital tools.
- Foster a **"Save First, Spend Later"** mindset.
- Reduce impulsive and unnecessary spending.
- Introduce financial literacy workshops in educational institutions.
- Create awareness about investments and long-term wealth creation.
- Promote the use of budgeting and expense-tracking applications.

Future Scope : -

- Development of personalized budgeting tools.
- Integration of mobile-based financial management solutions.
- Expansion of financial literacy programs in educational institutions.
- Further studies involving larger and more diverse populations.

Conclusion

The analysis indicates that students possess moderate financial literacy and positive saving habits. However, structured budgeting and expense tracking remain limited. Strengthening financial awareness, promoting disciplined spending, and encouraging digital financial management tools can significantly enhance students' long-term financial well-being.
